### Short Description:

Updates to Charlotte Park: Replace aging playground equipment

### Long Description:

Charlotte Park serves a diverse community of all backgrounds in a rapidly growing neighborhood. This includes numerous young families, elementary age children, and a variety of Little League teams. The current structure is small, run-down, and weather-worn from being in direct sunlight. The swing set area floods every time it rains and the playground area is located across from a dilapidated building. Additionally, families and children must walk by a porta-potty to access the play area. This project would rebuild and expand the run-down playground in Charlotte Park, adding age-appropriate structures for children ages 2-5 and 5-12, ultimately providing more playground access and a safer area for the numerous children in and outside of the community.

### Metro Comments

- The 5-12 structure will be replaced within the boundaries of the present playgrounds.
- Replace the swings and all the surfacing under the swings and the playground.
- Near the current playground add a 2–5-year-old structure that will give younger children a place to play on age-appropriate equipment.
- With the two playgrounds together, this should help the capacity of the park playground structures.

*This project page has been curated by a budget delegate, drawing inspiration from ideas submitted by Nashville residents until June 20, 2023. It has been shaped with initial input regarding scope and budget from a Metro department. While Metro is committed to adhering to the specified scope, adjustments or even the potential elimination of certain aspects may become necessary during implementation, influenced by site-specific or unforeseen conditions. Furthermore, the projects' funding source is from the American Rescue Plan Act (ARPA), which current guidelines require all ARPA-funded projects be completed by December 2026. Should any project be delayed or expected to be delayed beyond this deadline, it shall be subject to elimination. The implementation timeline will be rigorously monitored to ensure compliance with this crucial requirement. Any prospective alterations to the project will be subjected to rigorous scrutiny and resolution by the steering committee during their regularly scheduled meetings.*
